## Experience

### SMS Messaging App | SimpleText LTD

 08/2020—present

- Automating and scheduling text messages to customers.
- Responsible for design and creation of web interface, database set-up, API connections and server configuration.
- Multi-level model with custom portals for companies, resellers and distributors.
- Billing integration with Xero: automated invoicing and order details synchronised across the SimpleText system and Xero.
- Userbase: 110 users, 58 companies, 24 resellers, 3 distributors.
- Messages: sent 900, scheduled 427 and 40 campaigns.

### CTI System | WestWalesSystems LTD

 07/2020—06/2021

- Implementing a computer telephone integration system to replace the existing telephone system; providing a solution to the current CRM aspects of WWS.
- Programming phone IP handsets to a web-based system (using HTTP commands) in order to develop an online phonebook
- Log incoming/outcoming calls of WWS clients.
- Developing responsive and maintainable software

### Shift Scheduling | MHR LTD

 09/2020-05/2021

- Automate shift scheduling for a delivery company.
- Responsibility for design/optimisation of algorithm.
- Organising the technical side of the project; allocating roles to team members

### CMS & Stock Tracking Software | Fastview LTD

 07/2020—08/2020

- Designing a content management system (web app) as part of a Partner Programme: implementing UI/dashboards & forms
- Creating a Stock Tracking System to manage orders ahead of delivery—cutting costs from manufacturers; developing an interface to organise products thereby replacing large spreadsheets.

### Game Development | Fiverr

 2017—2018

- Creating simple 2D desktop/web games using Love2D or p5js
